## PROJECT INFO:

**Client:** Industry Laboratory

**Location:** KY

## See The Proof

Chances are this client's handy work has indulged your taste buds a time or two with your favorite drink. And like this lab's mission to bring unsurpassed flavoring to your preferred beverages, AMCASE® and its sales team have proven to bring unmatched modular casework and customer care to its clients.

This lab required a variety of design elements as diverse as their flavoring formulas. Working together, we designed something that delighted all of their faculties, not just their sense of taste.

## FUN FACTS

**146** - number of half-height drawer fronts replaced with full height fronts. Zero adjustments needed, 100% aligned!

**0** - number of issues (yes that's correct) and punch list items during this reconfiguration and additional installation.

# Replaceable Components

Our client previously chose AMCASE® as their sole casework solution due to the flexibility and reconfigurability of the product line. The capability to change our installed casework from drawers to doors to open spaces was extremely appealing.

After their initial installation which utilized half-height pharmacy drawer fronts in order to easily view stored products, their needs changed requiring some reconfigurations. In addition to furnishing a new area, they wanted to replace the half-height pharmacy drawer fronts with full fronts to conceal the drawers' contents and streamline the look of their lab. Both the addition and the drawer front replacements were carried out seamlessly. The client was extremely satisfied about their new look and the beautiful transformation to their lab.

Every solution is different; that's why there's AMCASE®.
